Brought together again in the center, still holding hands, they content them-selves with a more limited space, ranging themselves as though for a quadrille. The Beggars of Lisbon Begging and all the forms incident to it is a perfect pest in Lisbon. The nasals of the Portuguese are well adapted for the woful lamentations wailed forth in tones to melt a heart of stone. Mendicancy is a profession over which these beggars are master, and no tragedian has studied closer his part than have these wretches the part they depict. Little children, and some of them beautiful, are placed about the different places of amusement by some old crone who has hired them, and for a mere pittance the little actress wails forth her cry for a penny.
